

POWERING EXCEPTIONAL PERFORMANCES

ENERGY & FITNESS

General Fitness

NEW

You fit under the General Fitness category if you are a regular gym-goer, take part in cardiovascular or general aerobic exercise such as jogging or rowing, spin classes or participate in a sport such as tennis.

Two crucial factors aid an exceptional sports performance: energy and hydration. As we demand more from our bodies when we exercise, it is vital that we support our body and provide what it needs. **H³O Pro™ Isotonic Drink** offers hydration and energising benefits along with absorption qualities and key antioxidants to help protect the body's tissues against the potentially damaging effects of free radicals. It offers more than other leading brands on the market.

Herbalife offers science-based products to support your body's needs – before, during, and after exercise.

YOUR BODY'S NEEDS BEFORE, DURING, AND AFTER EXERCISE AND RECOMMENDED PRODUCTS:

BEFORE EXERCISE

(at least 1.5 hours before exercise)

Consume carbohydrates before exercising to provide a supply of energy.

DURING EXERCISE

Today, isotonic drinks are the preferred choice for most fitness enthusiasts and athletes wanting exceptional hydration and energy. Isotonic drinks have a similar carbohydrate and electrolyte concentration to your body meaning they are absorbed as fast, if not faster, than water. Drink **H³O Pro™ Isotonic Drink** during your workout for hydration and energy.

AFTER EXERCISE

Enjoy a tasty **Protein Bar** or a **Herbalife Formula 1** shake with a serving of **Herbalife Formula 3 Protein Powder** after your workout to provide your body with protein for muscle repair and to help build lean muscle mass.

WHAT'S IMPORTANT?

Hydration is important to avoid the negative effects of dehydration such as fatigue. Protein is important after exercising for muscle recovery and to help build lean muscle mass.

DAILY NUTRITIONAL PROGRAMME

Each day, nourish your body with healthy, balanced meals, fruit and vegetables supported by Herbalife's Core Nutrition products: **Herbalife Formula 1, Herbalife Formula 2, Fibre and Herb.**

TARGETED SOLUTIONS

For specific nutritional needs you can personalise your programme with complementary products from our Targeted Nutrition range. E.g. **Herbalifeline®** capsules to help maintain a healthy heart, additional antioxidant support with **Rose Ox***.

*The Rose Ox brand is the property of Zuellig Botanicals, Inc

Herbalife has an extensive sports sponsorship programme in place supporting top athletes and sports teams such as triathlete Olly Freeman – a UK Olympic hopeful, and the Finnish National Ice Hockey Team. Athletes have high nutritional demands due to their activity levels so good nutrition is a must; a healthy, balanced and varied diet teamed with Herbalife® products is a winning combination!
